

Balma STEPPS, a system of Balma shelving units, is a modular system which allows to arrange office, housing and public spaces. The system makes it possible to create communication routes and to establish visibly distinctive zones of work, relaxation and fun.

Das Regalsystem STEPPS ist modular aufgebaut und ermöglicht die beliebige Gestaltung von Räumen, ganz gleich im Büro, in der Wohnung oder in öffentlichen Gebäuden. Es ermöglicht die Gestaltung von Verbindungswegen und die Abtrennung eigener Bereiche für Arbeit, Entspannung und Unterhaltung.

Regaly Balma STEPPS to modułowy system, który umożliwia dowolną aranżację przestrzeni o różnym przeznaczeniu: biurowym, mieszkalnym czy publicznym. Pozwala na tworzenie ciągów komunikacyjnych i wydzielenie osobnych stref pracy, relaksu i zabawy.

Design perfect space

BALMA
STEPPS

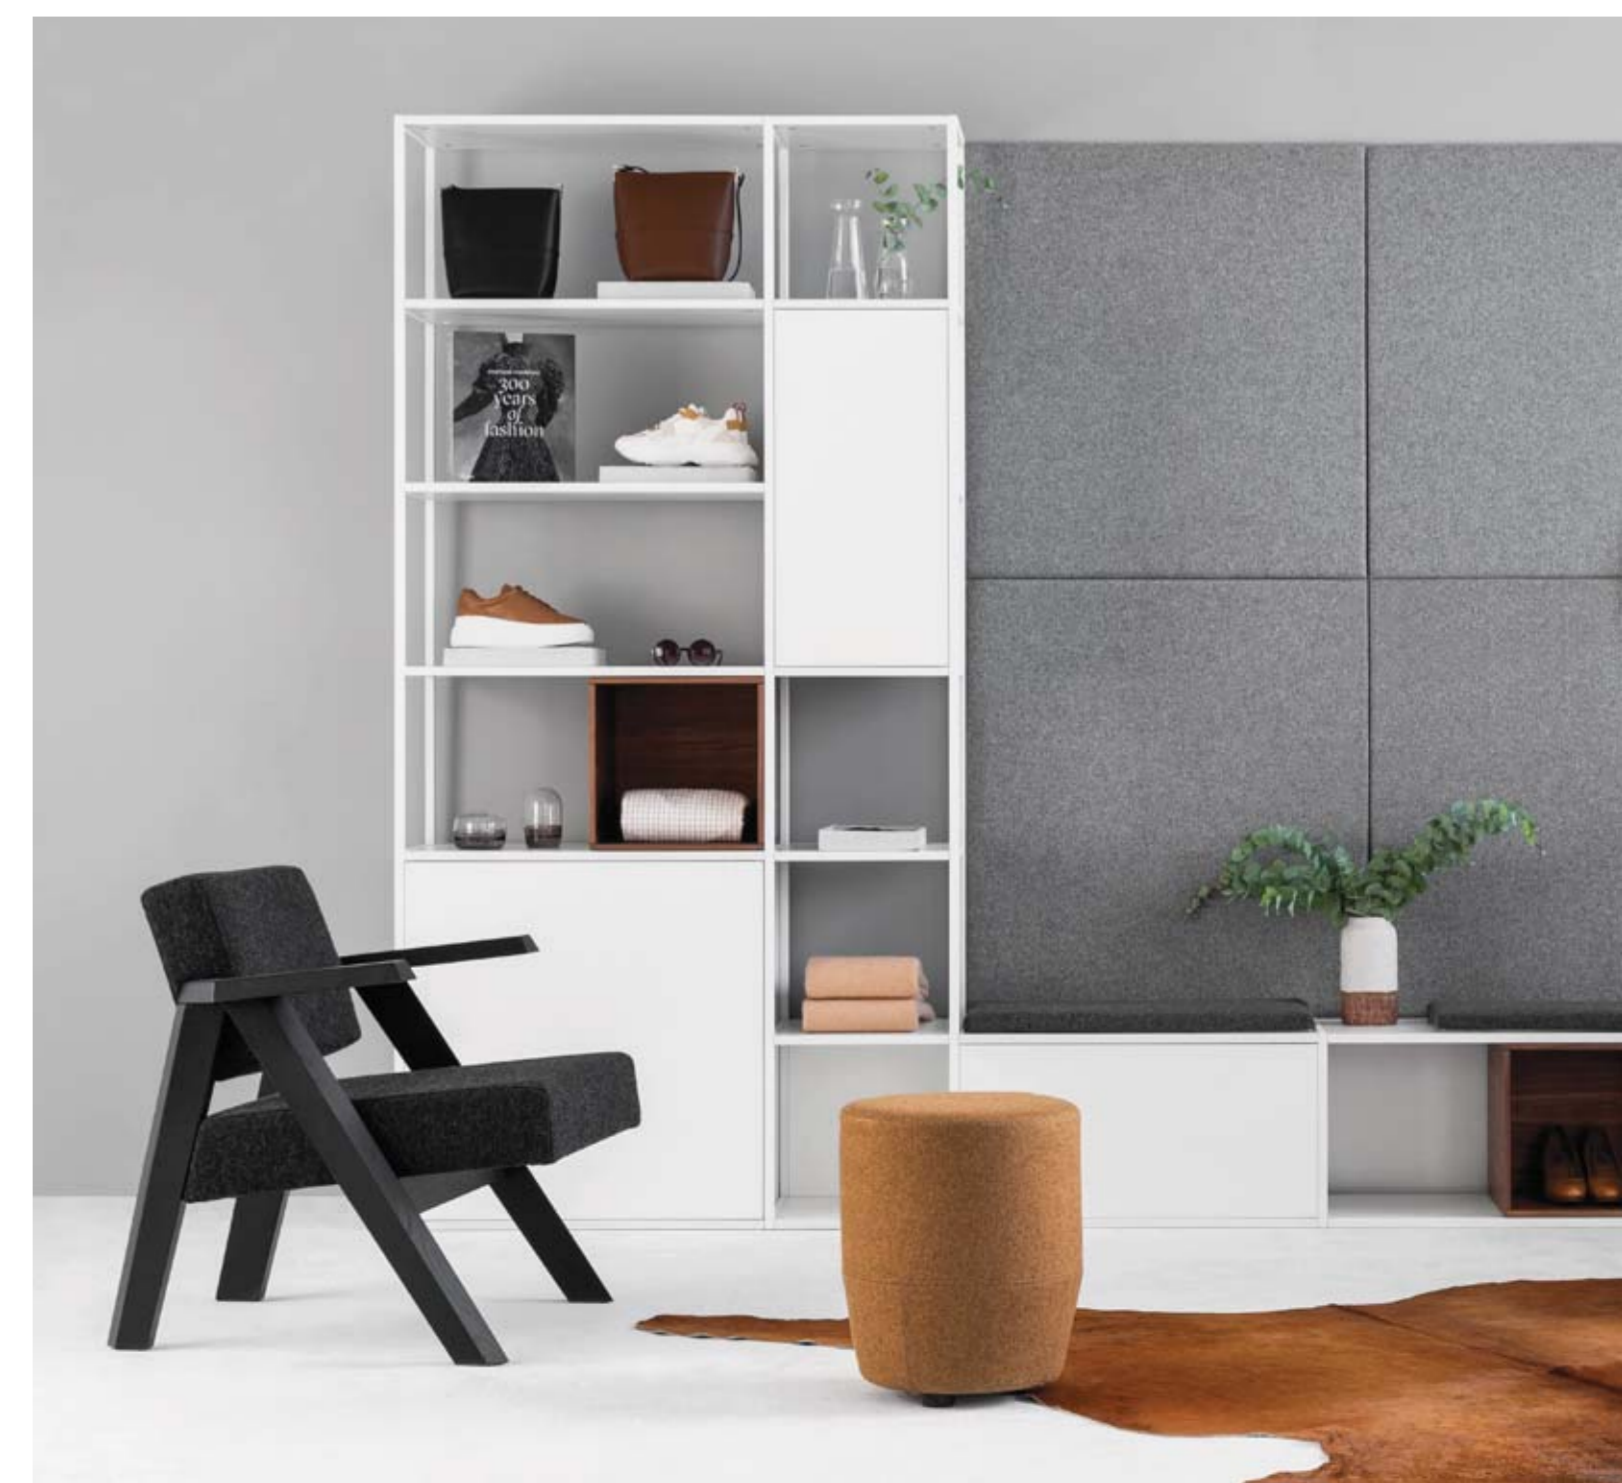

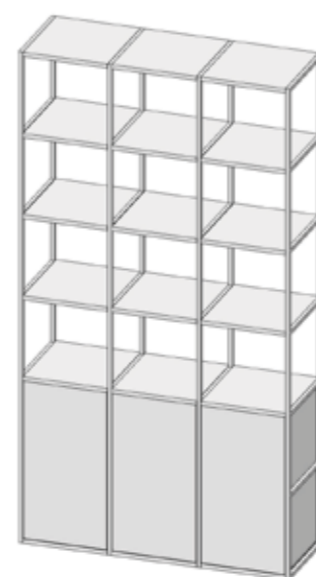

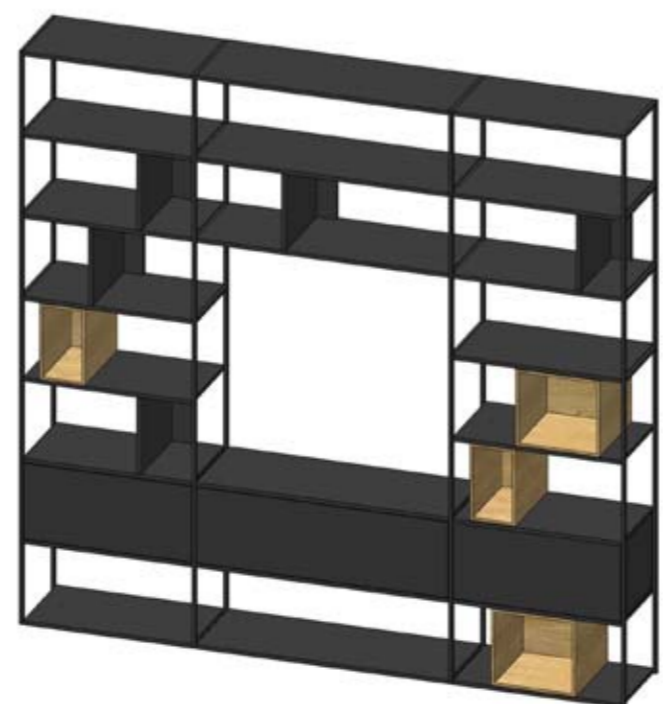

Well-balanced and imaginative

The constructed modules allow to build wall, corner or free-standing, accessed from both sides, shelving units. The stable and solid structure is guaranteed by metal ladders, which are connected by means of shelves.

Die Konstruktion der Module ermöglicht den Aufbau von Wandregalen, Eckregalen und freistehenden Regalen mit Zugang von beiden Seiten. Die Querelemente aus Metall bilden in Verbindung mit den Regalböden eine stabile Konstruktion.

Moduły zostały skonstruowane tak, aby można było budować regaly przyściennie, narożnikowe oraz wolnostojące z dostępem z dwóch stron. Stabilną konstrukcję tworzą metalowe drabinki połączone półkami.
