

Clipso: Coverings and profiles for walls, ceilings and fabric-mounted advertising > CLIPSO coated fabric tension profiles

CLIPSO-FPS, tension profile ranges

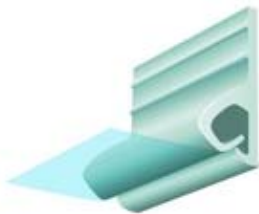

For the installation of its coverings, CLIPSO® offers you several ranges and types of coated fabric tension profiles designed for the sector's numerous applications ([Building](#), [Print](#), [Design](#)).

The "standard" range for conventional ceilings, the "Q" range for wall coverings, the "J" range for stands, the "Aluminium" range for stand-alone ceilings, frames, partitions and screens, etc.

The various CLIPSO-FPS® clipping systems make CLIPSO® coverings simple and quick to install.

You will find our full CLIPSO-FPS® profile range, as well as product characteristics and applications, on our technical data sheets that can be downloaded from the [documentation](#) section.
