We like peace and quiet when we work. That's why we started SilentLab, where we create quiet and send it wherever it's needed the most. Our original office acoustical solutions carve out oases of calm and privacy even in the noisiest interior environments.

Open offices are more popular than ever, but along with greater interaction comes overwhelming noise. Thanks to our team of acoustics experts, we enable companies to provide employees with the distraction-free workspaces they need to perform and collaborate at optimal levels. Our unique mobile soundproof offices, acoustical wall panels, ceiling hangings and other sound-reduction accessories are all made at our in-house production facilities in the Czech Republic.

Our holistic approach to sustainable sound empowers us to create complete acoustic solutions. We can also work with you to devise highly customized solutions precisely tailored to your needs. Visual appeal is as important to us as top-tier performance, which is why all our products combine unique designs with maximum functionality.

ABOUT US

MICROOFFICE is an oasis to minimalism in the shape of an independent workspace. It is the bridge between the two halves of its environment, creating a private and peaceful inner world in the center of the chaos around it. These two realms are linked through vision, energy, light and sensation.

The MICROOFFICE design approach is one of duality, an act of balance between fundamental principles – body and space, transparent and unobtrusive, unyielding yet soft, intimate yet open.

The interior space is ensconced on all sides by a solid shell. The resulting object is opaque from one point of view, a tangible barrier dividing two worlds. From another perspective, it is nearly invisible as it merges with its surroundings. The glass ceilings of the UNIQ and larger QUADRIO models bathe the occupant in soothing natural light.

We've selected the materials used to create MICRO-OFFICE with great care. As a result, the serene design reflects both the simplicity and power contained within our concept.

CONCEPT

ACOUSTICS

MICROOFFICE is an answer to the basic question of acoustic comfort. Layers of solid wood and acoustic materials, along with sound-insulating glass, a sonically sealed door and a silent ventilation system, make for maximum soundproofing between the interior and exterior spaces.

The extensive surface area provides optimal distribution of acoustic materials, leading to the creation of a quiet, pleasant interior environment. The entire structure has been calibrated to counter the specific frequencies of the human voice, making it an ideal setting for phone or conference calls.

DESIGN

Based on the above principles, the concept and features mesh in perfect harmony. On two sides, solid facades protect the user from the most persistent sources of noise. The reassuring back wall evokes a feeling of security, while the opaque front eliminates visual distractions.

The other faces are made entirely of sound-insulating glass. The solid walls protruding above the ceiling create the unmistakably iconic "U" shape of the MICROOFFICE UNIQ.

TECHNOLOGY

Central to the MICROOFFICE experience is its cutting-edge ventilation system. Exclusive to our product family, this completely new innovation promises untold levels of comfort. With ultra-efficient ventilation supplying a constant stream of fresh air, users can enjoy the distraction-free solitude of our revolutionary workspaces for hours on end.

Each MICROOFFICE unit comes fully equipped with everything needed to perform at optimal levels. Electrical sockets, USB and LAN connections and an LED light are standard across the entire product line.

MATERIAL

Our choice of materials reflects our commitment to the dual principles of MICROOFFICE. As such, we've upholstered the entire solid shell, while the transparent glass insulates against sound on both sides.

Horizontal divisions across the upholstered surfaces connote scale, while hand-crafted details around the border of each piece add subtle elegance. The entire structure is inspired by the ideal ergonomic height for a table or bar stools. Design accents and interior accessories are carved from solid oak.

MICROOFFICE UNIQ captures an insulated bubble of peace without the burden of difficult installation or renovation. Our new iconic design features a unique ventilation system, high-end acoustic materials and even more sophisticated details than before.

JAN KALIVODA & VOJTECH KAAS /PROGRES ARCHITECTS/

We are an architecture studio.

Since 2006 we have been working on small and large projects incorporating space, mass, light, materials and feelings. We believe that strong, functional and balanced architecture must be rooted in the specific conditions of each project.

We take pride in a job well done.

The quality of the indoor spaces plays a key role in our projects. As we were designing AON's European headquarters in the centre of Prague, we paid particular attention to ergonomics, lighting and especially acoustics. We found a partner for our vision of the space in the context of historical architecture in the people at SilentLab. They were the only ones not afraid to look for new ways and take current technical possibilities as far as they can go. The result is an extraordinary completed project that has drawn international recognition.

As part of the project we developed our own concept of small solitary meeting spaces with extremely high-quality acoustics.

DESIGNERS

Do you have an eye for design and refuse to settle for less than top quality? Our line of MICROOFFICE compatible accessories has been carefully designed for the discerning client. You can choose from a wide variety of furniture and leading-edge technologies to take your work environment to the next level.

OPTIONAL EQUIPMENT

AV TECHNOLOGY

AV connection points are built into MICROOFFICE from the factory and combine with complete soundproofing, modern equipment, and high quality audio and video to provide the best meeting environment, all while maintaining a clean and unique design in the market.

All you have to do is choose from our two options for the screen location in the MICROOFFICE: placement of AV connection points in the glass wall or in the wall panel on the right side. It's that easy!

TECHNICAL DETAILS OF CURTAINS

materials	72% polyester, 28% cotton (festival) 69% polyester, 31% linen (estoril)
weight	199g/m² (festival) 110g/m² (estoril)
width	300 cm / 118 in

The rail for the hanging and curtain guide is located 60 mm from the edge of the frame.
The exact composition of the fabrics and information about the curtains and drapes can be found in the material lines.

CLARITY PROTECT

Safe and sound. That’s exactly how we want you to feel in our MICROOFFICE during these insecure days. To guarantee you both, we are introducing our Clarity System – an innovative way of indoor protection.

TECHNICAL DETAILS

location	inside the MICROOFFICE ventilation bowels
ozone concentration inside MICROOFFICE	< 0,01ppm*
ion production	10 000–200 000 positive and negative ions per cm²
certification	RoHS, EMC, CE a UL

* The standard of international standards for ozone concentration is defined by a maximum value of 0.05ppm.

THE FUNCTIONALITY OF THE CLARITY SYSTEM

- Effectively eliminates a wide spectrum of dangerous microorganisms incl. COVID and SARS
- Neutralizes odors
- Decreases the threat of allergic reactions
- Effectively disinfects the air environment without chemical treatment
- Reduces the number of dust particles in the air

The Clarity system is fully integrated into our ventilation system.

TOUCHONE

Simple and fast installation without requiring professional knowledge. Easy reservation directly from the touch panel, computer or mobile device using Outlook, Microsoft Office 365, Microsoft Exchange Server or G Suite. The touch panel displays the current status of the room, booking calendar, and other booking options, such as cancellation, extension or termination.

After you've chosen the right soundproofing tech for your office, bring it to life in one of three distinctive material options. Take your first steps towards a more tranquil workspace with SOFT, focused on maximizing functionality and value. Next, there's AMBIENT, which features two fabric options for increased comfort and performance. Finally, the PULSE line offers high-end fabrics to achieve the utmost in quality and design.

SOFT

SOFT is our entry-level category, made from BOMBAY fabric for an emphasis on effortless functionality. The PVC exterior is water-repellent and sleek, sure to complement any professional workspace, while metal frames ensure long-lasting quality.

AMBIENT

Our AMBIENT line comprises two appealing fabric choices: the irresistibly soft ASPECT, made from 75% flame-retardant Trevira CS, or the durable WOOLLAND, with its natural wool fibers, water-repellent and flame-retardant finish. Either way, you'll enjoy superior comfort and functionality.

PULSE

PULSE blends high-end fabrics from natural materials. Our enticing BLAZER and SYNERGY fabrics are exclusively sourced from verified partners who place a high premium on quality. As stimulating to the eye as they are to the touch, PULSE designs feature vibrant quilted arrangements with warm colors that promote creativity and enthusiasm. WOOLLAND QUILT is the brand new addition to our PULSE fabric line, which brings a modern twist to this material due to the aesthetical quilting.
